SUMMARY

M.Sc. Data Science student at RKMVERI with a strong mathematical foundation and hands-on experience in Machine Learning, Deep Reinforcement Learning, and distributed AI systems. B.Sc. Mathematics (Hons) graduate with CGPA 8.01. Built end-to-end ML pipelines, deployed APIs, and developed AI-powered semantic search systems independently.

EDUCATION

Ramakrishna Mission Vivekananda Educational and Research Institute (RKMVERI)
MSc in Data Science, 2025–Present
CGPA – 6.3 (till sem 1)

Bankura Christian College
BSc (Honours) in Mathematics, 2022–25
CGPA – 8.01

Higher Secondary (XII), WBCHSE, 2022
94.8%

Secondary (X), WBBSE, 2020
92.14%

SKILLS

- **Languages:** Python, C, C++, R, SQL
- **ML/DL:** Supervised Learning, Deep Q-Networks, Semantic Search, Model Evaluation
- **Frameworks:** NumPy, Pandas, Matplotlib, Scikit-Learn, sentence-transformers, Dask, FastAPI
- **Tools:** SQLite, Git/GitHub, Jupyter, Google Colab, VS Code, Excel

COURSE WORK

- Machine Learning, Artificial Intelligence, Deep Learning, LLM, Agentic AI, Blockchain
- Probability and Statistics, Linear Algebra, Optimization, Time Series Analysis
- Distributed Computing, Data Structures and Algorithms

ACHIEVEMENTS & SCHOLARSHIP

- INSPIRE Scholarship – Govt. of India (Merit-based)

CERTIFICATES

- NPTEL – Python Programming
- NPTEL – C++ Programming

PROJECTS

Crop Disease Detection using Remote Sensing Images
Python, PyTorch, CNN, OpenCV, NumPy Feb 2026 – Apr 2026
Developed a deep learning-based system for crop disease classification using remote sensing imagery. Applied image preprocessing and augmentation techniques and trained CNN models for automated disease detection. Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix analysis.

Repository-Aware Autonomous Coding Agent
Python, Flask, Ollama, Sentence-Transformers Mar 2026 – May 2026
Developed a fully local autonomous coding agent with a VS Code-like web IDE and an SWE-agent style execution loop for planning, code editing, testing, and self-correction. Implemented repository analysis, embedding-based retrieval, safe SEARCH/REPLACE editing, loop protection, and multi-language code execution using local LLMs via Ollama.

Distributed Educational Video Search System
RKMVERI Mar 2026 - May 2026
Developed an AI-powered system to retrieve top 3 relevant YouTube timestamps from multilingual user queries. Used sentence-transformers and cosine similarity for semantic retrieval, ranked results by relevance and view count. Implemented parallel search with Dask, a semantic cache (SQLite), and a web fallback mechanism for reliability.

Spam Email Detection System
Python, scikit-learn, TF-IDF, Flask Sep 2025 – Nov 2025
Built end-to-end ML pipeline with text preprocessing and TF-IDF feature extraction. Trained and compared Naive Bayes, Logistic Regression, and Random Forest models. Evaluated using precision, recall, F1-score, and ROC-AUC; deployed model via Flask for real-time prediction.

Mountain Car RL Agent (DQN)
Python, Gymnasium, Deep Q-Network Sep 2025 – Nov 2025
Implemented Deep Q-Network with experience replay, target network, and epsilon-greedy exploration strategy. Tuned hyperparameters and tracked learning curves to achieve stable convergence in the Gymnasium environment.

ACADEMIC RESEARCH

A Study on Countability
B.Sc. Dissertation Feb 2025 – Jun 2025
Studied finite, countable, and uncountable sets with formal proofs: Cantor's diagonal argument, countability of N, Z, Q .
